

Planning a Trip?

3 kinds of immunizations should be considered when traveling:

Routine – All travelers should be up to date on routine vaccinations when traveling to any destination.

Required - These vaccines are required to travel to a specific country. Countries may require proof of the vaccine before entry.

Recommended – Most travelers get vaccines or medicines when there is a risk of disease in the country they are visiting.

Protect your health, make a travel appointment today

Travel appointments include:

- Personalized assessment of health needs based on travel plans.
- Vaccines and prescriptions for required or recommended medications.
- Education about common diseases in the country, personal hygiene, and food and water safety.
- Counseling on general travel safety for the region you plan to visit.

Cost:

\$25 for the first 2 people
\$10 for each additional person
